The Prohibition Platform.

The resolutions adopted by the Pro hibition Convention are a queer jumble of religion, political economy, socialism and fanaticism-a sort of crazy-quilt in politics. The first of the series contains the

fundamental error in the Prohibition idea. It declares it to be the function of government to "guard sacredly public morals and private life." 'This is a radical misconception. Governeler returns so many times as Henry ment has rightfully nothing to do with the "private life" of its citizens except to see that they are protected in their rights and privileges and that they obey the laws. WHAT AILS THE HATION?

The Average Length of Life Decreasing-Not Pestilence-Not Famine-All our own Fault.

MODERN COOKING AND MOD-ERN LIVING have brought it on. It comes upon us unawares. The patients have pains about the chest and sides, and sometimes in the back. They feel dull and sleepy; the mouth has a bad taste, especially in the morning. A sort of sticky slime collects about the teeth. The appetite is poor. There is a feeling like a heavy load on the stomach: sometimes a faint, all-gone sensation at the pit of the stomach which food does not satisfy. The eves are sunken, the hands and feet become cold and feel clammy. After a while a cough sets in, at first dry, but after a few months it is attended with a greenish colored expectoration. The patient feels tired all the while, and sleep does not seem to afford any rest. After a time he becomes nervous, irritable and gloomy, and has evil forebodings. There is a giddiness, a sort of whirling sensation in the head when rising up suddenly. The Lowels become costive; the skin is dry and hotat times; the blood becomes thick and stagnant; the whites of the eyes become tinged with yellow; the kidney secretions becomes scanty and high colored, depositing a sediment after standing. There is frequently a spitting up of the food, sometimes with a sour taste and sometimes with a sweetish taste; this is frequently attended with palpitation of the heart and Asthmatic symptoms; the vision be-

comes impaired, with spots before the eyes; there is a feeling of great prostration and weakness. All of these symptoms are in turn present. It is thought that nearly one-half of our population has this disease in some of its varied forms. Shaker Extract of Roots (Seigel's Syrup) changes the ferments of the Digestive organs so asto convert the food we cat into a form that will give nourishment to the feeble body, and good health is the consequence. The effect of this remedy is simply marvelous. Millions upon millions of bottles have been sold in this country, and the testimonials in favor of its curative powers are overwhelming. Hundreds of socalled diseases under various names are the result of indi-

gestion, and when this one trouble is removed the other diseases vanish, for they are but symptoms of the real malady. Testimon ... from thousands · highly of of people : ...s prove its cure: ... t. Sold by
